SECTION 00900
RESPONSES TO QUESTIONS
SUBMITTED BY PLANHOLDERS
FOR
RFP NO. W9128A-04-R-0011

Q22. From Dan Ching, KD Construction, e-mail dated 3/31/04:

We would like to JV this project with our mentor, Kiewit Pacific. Last time we were unsuccessful because the JV did not do any projects together previously.

Is this still correct, that if the JV never did any work previously, the JV will not be considered?

A22. Joint ventures that have not done work together will be considered.

Q23. From Ethan Twer, Designer Built Systems, e-mail dated 5/10/04:

Please refer to specification section 00120.2.4.4 Factor III, Management Plan.

Shall we identify the minimum qualifications for the key positions listed here only, or shall we also provide minimum qualifications for our Program Manager, Project Manager, Superintendent, Project Engineer and Site Safety Representative?

A23. Provide minimum qualifications only for the positions shown in Section 00120.

Q24. From Henry Aylward, Aylward Enterprises, e-mail dated 5/7/04:

We had three IDIQ contracts with the Corps.

We did Workplan format construction. In all cases, we were issued a task orders to workplans. Then we were issued task orders for construction. AE services are considered incidental to the construction. We should be allowed to combine the workplan task order cost and the construction task order cost to determine if those task orders meet the half million past experience requirement.

Some projects are split into different task orders and construction task orders because the work would be administered by your different residence offices. For one project it was split into six task orders, 3 workplans and 3 construction. In this case the three projects should be combined as one project. They were all issued at the same time.

Request refinement to your definition of design build to combine workplan and construction cost into one past performance project as well as project that was split various task orders and construction into one past performance project.

A24. As stated in the RFP, an individual task order must exceed \$500,000 to be considered a relevant project.

Q25. From Henry Aylward, Aylward Enterprises, e-mail dated 5/10/04:

Per the attached, how would the MATOC address EPA?

A25. Economic Price Adjustment provisions (FAR 16.203-3) will not be included on this MATOC. Should the Contracting Officer determine the need for this clause, it will be included on individual task orders.

Q26. From Marge, M Shiroma, e-mail dated 5/12/04:

As stated in the solicitation, the guaranteed minimum quantity is \$62,500 and maximum of \$25 million for the base period. Due to our bonding capability, is there a possibility of providing a more accurate price range and type of projects anticipated?

A26. The Government cannot provide an accurate price range of individual projects at this time. The type of projects could involve construction in many of the areas identified in Paragraph 2.4.2.1 in Section 00120.

Q27. From Dorene Takeuchi, Noguchi & Assoc, e-mail dated 5/11/04:

As this is a D/B and D/BB type solicitation, will the architect/engineer be required to stamp his own work (as required in normal construction situations and permitting processes)?

The reason for this question is to place responsibility at the source, rather than having the contractor assume the liability of the professional. I am trying to distinguish the extent of the contractor's liability in this design build scenario.

Can you provide any indication of the extent of design to be required. For example, will there be complex whole building design; or is this more design/retrofit new windows in an existing building?

A27. In accordance with Paragraph 52.236-25 in Section 00700, registered architects or engineers shall prepare or review and approve designs or other engineering features of work.

Under a Design-Bid-Build scenerio, the Architect/Engineer is responsible for the professional quality, technical accuracy, and the coordination of all designs, drawings, and specifications. Under a Design-Build scenerio, the Prime Contractor is responsible for the professional quality, technical accuracy, and the coordination of all designs, drawings, and other non-construction services.

The extent of design requirements could span from simple to very complex projects.

Q28. Dorene Takeuchi, Noguchi & Assoc, e-mail dated 5/11/04:

Once an RFP is issued, on what basis is a task order award made? What constitutes best value? Are other factors considered before low price?

A28. The Request for Proposal will identify the evaluation criteria that will be used for each task order. The evaluation criteria could be price only or a combination of price and other technical factors. Best value is a comparative evaluation between price and technical factors that results in the selection of the most advantageous offer to the Government.

Q29. Frank Wirt, Marsh USA, e-mail dated 5/10/04:

Do you plan to keep the bid bond for five years (two base years and the three options years, if awarded)?

A29. The bid bond is required to be submitted with the proposal. Once a contract is awarded, a bid bond will no longer be required.
